The vote at the last Presidential election is worth remembering:

vote of the people of the United States. He was consequently in a minority of 947,288 votes in the United States. He was not, therefore, a President by the will of a majority of voters. None of the majority would have voted lor him. Any one of the other candidates might have withdrawn, and Mr. Lincoln would not have won a vote, or not enough votes to vary the result materially. Mr. Lincoln, then, ls President by the provisions of the Constitution. It seems to us that a President thus made by the Constitution should be unnsually careful of that instinment. In recognizing the rule of Abraham Lincoln we did not recognize the rule of King Numbers, but the rule of the Constitution. We were loyal to it, not to a majority of the

ally. His whole party press is employed in excusing plain violations of the Constitution. There is a necessity to preserve the Government, and it is the highest fidelity to the Constitution to preserve the Government. Well, suppose any party shall take it into their heads that to preserve the Government the majority rule, and that the provision of the

The stars of the new flag represent the new constellation of States rising in the West. The idea was taken from the constellation Lyra, which in the hand of Oppheus signifies The bine in the field was taken namony. The bine in the held was taken from the edges of the Covenanter's banner in Scotland, significant of the league covenant of the United Colonies against oppression, involving the virtues of vigilance, perseverance and justice. The stars were in a circle, symbolizing the perpetulty of the Union, the ring like the circling scruent of he Egyptians, algulying eternity. The thirteen acrip showed, with the stars, the number of the United Colonies, and denoted the subordination of the States to the Union, as well as equality among themselves. The whole was the blending of the various figa previous to the Union flag, viz: the red fig of the armles and the white of floating batteries. The enemy responded from plueteen guns, mostly anall guns, which did lattle damage, but also with one 32-pounder, which swepthe opposite shore, and one fire from which killed the horse and tore off the leg of Abram McCock, of Lilly's battery. Our fire was very destructive, and every battery which opened on us was disabled. Lilly threw shells with great precision into the embrasures of the chemy.

The works of the enemy on the river are reported very strong. The parapets are not less than fifteen feet wide, and several water butteries on a level with the river have been discovered. Moored at the whari were two steamers, and opposite the city a pontoon bridge of forty-seven boats. The larger of the steamers was snuk by our fire, and the smaller one disabled. THE VASSACRE AT LAWRENCE-SOMEBOD TO BE CALLED TO ACCOUNT - The Circium. tiazette o: yesterday has en article which w think needs explanation. Is it possible the was \$12,000 Gezette le about to render itself liable to the charge of treason by criticising the conduc. of the President in regard to the management of the war? The article is a short one, bu. we wouldn't wonder It there is a good deal of

meaning in lt. Here It is: Nothing in the history of Indian surpasses in a rocky the sack and borning the flouri hang city of Lawrence, and thurstery of its on zeas by the rebals and Quantilly. The town was surprised in thich. No resistance was mide, then we essons we hav had that we re currying a war with savages, outlaws of civilization and buinsuity, and of the necessity of hold-ing in our own hands the means of relatition.

and of using them to compel the enemy to respect the rules of warlard.

The country will expect an explanation The country will expect at explanation from the military officers in Kansas and Missouri, how t is raid can have been possible; how the warlike people of Kansas, who for several years have been acconstomed to defend their own homes from invasion, can have been left thus unguarded by the military and defenseless themselves. The public has heard much of the zeal of the military authorities much of the zeal of the military anthorities for putting down "Jaybawkers"—a term which the Democratic press applies to all the Kansis fighting mez—and it will naturally inquire whether this is the first fruit 'ol that labor; and if so, whether this effort had not better be directed against the enemy.

The London Times concedes that the rebel situation la desperate, and claims only the slender consolation that perhaps the flerce determination of the rebels may enable them to proiract the contest. It does not, however, attempt to explain how they are going to make an effective fight with their conntry nearly overrun by Union troops and their supply of men exhausted. The Globe, which has the reputation of being Lord Palmerston's semi-official organ, asserts positively that there is nothing precarious in the relations of Great Britain and America. Gov. Hatch, ex mayor of Cincinnati,

nas sned that city for a lay as fees for the seue and recording of licenses for taverns, theaters, shows, concerts, balls, lectures, hackney coaches, omnibuses, drays, undertakers, ferries, peddlers, etc. The petitioner states that in pursuance of the ordinance on this subject he issued 6,984 licenses, which were duly recorded according to law, and the amounts received paid promptly into the city treasury. He claims a dollar from the city for each license. Total amount sued for, \$6,560.

It is stated that Secretary Chase, dnring his late visit to New York, at the anggestion of capitalists there, determined to continne the sale of the five twentics till after ten days' notice to the public of a discontinuance. A Chapter of Blunders.

From a pleasant paper in "Once a Week," devoted to Sir Boyle Roche, the eccentric Irish orator, we make the following extract: Thus far the public life of Sir Boyle Roche There is now another view of him to be considered—the pleasant little obiter dieta which have been put down to his score, and which there is no reason to doubt he really gave utteraces to. After all, it is natural to suppose that the constraint of public speaking must have fettered the bovine fancy and checked the more frequent introduction of the conver-cational bulls, in the reading of which he is enproced to have had great skill.

It was Sir Boyle who speke in feeling terms of the gentleman with whose family he was connected by marriage: "He gave me hi eldest daughter, sir," he said to one of the prefessional wits of the Irish bar, "his eldes daughter, sir." To him the wit replied: "I he had had an older one he would have given Mr. Curran used humorously to insist that

Mr. Curran used humorously to insist that these strange bits of confusion were all the result of careful preparation; perhaps scarce; crediting that there could be lound a mind with such an inveterate constitutional twist in it. In the Irish House, these sayings were welcomed with uprogress hildering. There was the famous speech which confounded generations: "I don't see, Mr. Speaker, why we should put ours lyes out of the way to serve posterity. What has posterity, one for us?" He was a little deconcert d by the burst of laughter that followed, and proceeded to explain his meaning: "By and the second of the second of the second of the confounded of the second of the way to serve posterity. SIMPLICITY AND ECONOMY COMBINED

TISDEL & NASH'S Patent Attachment

FOR BURNING

IN FLUID LAMPS.

PATENTED MARCH 24, 1963.

THIIS IS AN ARTICLE W. NT OF ITS UTILITY, SIM. pllelty and economy, has been kind ever invected, by the kind ever invected, by the best thing of lamb, you can burn kerosene. At our whoolus smoke or smell, while more light is obtained from a given quantity of Oll than with any other burner. With one of these burners applied to any find lamp it may be moved rapidly about, or even carried out of doors, without the light being extinguished.

WHAT THEY SAY OF IT. A Valuable Invention.—One of the best, and at the same time, most simple contrivances for birning Kerosene (i) in a common fluid lamp. It is so simple that any child can apply it, as 'it will burn Kerosene (ii) in any fluid lamp will be bout even changing the wicking. It is one of the neatest binns that has come under our notice, and is destined to become very popular with all who use it. It burns the (ii) perfectly, will no smoke, and will save many times its cost in a few months, and for portable or night lamps it appears to be the ne plus ultra.—[Syracuse Courier and Union.]

It accomplishes the childer carry norfactly, and dispenses with the appoy-

[From the Scientific American.]

It accomplishes the object very perfectly, and dispenses with the annoyance and expense of the inconvenent chimney. A free and steady Ight, without smoke, is obtained, when a good quality of oil is used. The keventien co siss in apply at the metalic burner, to the tube of the Lamp; the burner is simply allipsed over this, and can be easily adjusted to any fluid lamp; thus emilipsed, coal oil can be burned in It as readily as find. The burner should be allowed to project above the top of the tube a distance qual to the diameter of it, or about 3-bof aninch; and the wings, compoling the attachment, must be separated, so as to allow the division to be just equal to the size of the tube. These hamps are very convenient for household purposes, as they on he carried in the hand in draughts or currents of all without veling extinguished.

"It is an adm rable invention, and effects the purpose in the signalest parts."

"It is a very simple contrivance, and entirely effectual, and has a rapid and extensive saie."—(Express. Other journals speak in like terms, and the most flattering testimonials are being constantly received rom agents and others as to their efficiency and economy; in fact they have corned for themselves a wide-spread reputation.

I have room to give but a few testimonials of the many lattering let ers received by me, from the g sat number hat have purchased. Send for a circular. Mr. J. D. BONDERANT: The Eight-horse Steam Thresher and Cleaner bengit of you, is given up by all to be the best in this county. I have threshed 800 bushels paiday, and am well pleased with my machine.

J. B. WOOLFOLK. Mr. J. D. BONDURANT. LOUISVILE, Xv. June 27, 1863.

Mr. J. D. BONDURANT. LOUISVILE, Xv.: The Garr's Improved Thresher and Separ-tor bought of you last year performs well and gives satisfaction generally. Although it was late when we got our Machine, we threshed over (16,000) sixteen thousand bushe a without a break, accident or hindrance in any way. We threshed from 800 to 600 bushes per day, and have threshed 2 bushes per minute. We have no history in saying that wherever introduced they will supers-de all others.

Grin dealers do not object to the manner in which his Machine cleans the wheat. This they do with many other Machines.
